

CYRUS MARINE

FUEL CONDITIONING TREATMENT

CYRUS MARINE IS A HIGHLY EFFECTIVE FUEL TREATMENT WHICH IMPROVES YOUR ENGINE'S PERFORMANCE, REDUCES AIRBORNE EMISSIONS AND FUEL CONSUMPTION. WITH FUEL NOW THE SINGLE MOST EXPENSIVE FACTOR OF OPERATIONAL COSTS WITHIN THE MARINE INDUSTRY...
CAN YOU AFFORD NOT TO USE IT?

KEY PRODUCT FEATURES

- Reduces component wear and protects injectors and fuel systems from damage caused by water carried in the fuel.
- Disperses water from fuel and fuel tanks providing protection from microbial growth (diesel bug) particularly where fuel is left in long term storage.
- Eliminates smoking and reduces fuel consumption typically by 5%.
- Recommended for application to all marine fuel types and vessels (e.g. trawler fleets, ferries, leisure craft, workboats).
- Recommended for application to land based machinery (e.g. land tugs, generators, cranes).
- Mixes easily with fuel and does not contain any abrasive or aggressive chemicals that may damage components.
- Suitable for application to petrol/bio-ethanol and diesel/biofuel combinations.
- A treat rate of 1 part Cyrus Marine to 2000 parts fuel offers fractional treat cost.
- Available in 1 litre, 5 litres, 25 litres and 205 litres.
- MSDS available upon request.
